JPMORGANCHASE
LONDON

Dear Hiring Manager,

I am excited to apply for the Investment 20/20 Internship Program at JPMorganChase. With a background in Financial and Business Economics and current pursuit of a Master's in Data Science, I am eager to contribute quantitative analysis, financial modeling, and data-driven decision-making skills to your asset management and client services teams.

Through my undergraduate studies, I conducted bond portfolio analysis, investment strategy assessments, and financial market research, most notably in the Greydanus, Broekh and Associates (GBA) Yield Curve Analysis coursework. This experience strengthened my ability to evaluate fixed-income instruments, assess risk-adjusted returns, and interpret yield curve movements—key components in asset management. Additionally, my exposure to performance analytics in the Performance Sports Group investment case study reinforced my ability to analyze financial statements and assess investment viability.

Beyond academics, I am passionate about applying data science in finance, with proficiency in Python, SQL, and financial modeling tools to enhance investment insights and operational efficiency. My strong organizational skills, attention to detail, and ability to manage multiple priorities make me well-suited for the fast-paced environment at JPMorganChase.

I am eager to bring my analytical mindset, collaborative approach, and problem-solving skills to your team. I welcome the opportunity to further discuss my qualifications and how I can contribute to your firm. Thank you for your time and consideration.

Best Regards,
Ayush Pradhan
